Profile Summary

Software Engineer with **3+ years of experience** in **C#, ASP.NET Core, Angular, and SQL Server**, specializing in **banking and financial domain applications**. Proven expertise in building **secure, scalable, high-performance** web applications, REST APIs, schedulers, and reporting systems. Strong experience in **Margin Call, Treasury, and Statement of Accounts systems**, Strong expertise in **REST APIs, scheduler services, SQL performance optimization**, and **production support** within Agile/Scrum environments.

Skills

- **Backend:** C#, ASP.NET MVC, ASP.NET Core, Web API, Web-Forms
- **Frontend:** Angular 14+, TypeScript, JavaScript, HTML5, CSS3, Bootstrap, jQuery
- **Database & ORM:** SQL Server, Oracle, Entity Framework, Dapper, ADO.NET, LINQ, Stored Procedures
- **Architecture & Concepts:** REST APIs, Scheduler Services, Authentication & Authorization, MVC, SOLID Principles
- **DevOps & Tools:** Visual Studio, Git, GitHub, GitHub Actions, Jenkins, IIS, Postman, Swagger
- **CI/CD & Agile:** CI/CD Pipelines, Agile/Scrum, Jira
- **AI & Productivity Tools:** GitHub Copilot, ChatGPT

Work Experience

Wipro

Software Engineer | Dec 2024 - Present

- Working on ICICI Bank treasury and compliance systems, including Margin Call, Statement of Accounts (SOA), TRA, TCC, and FXNOOP.
- Developed and enhanced .NET-based backend services and REST APIs for high-volume financial transactions.
- Implemented automated schedulers and background services, reducing manual effort and operational risk.
- Designed and optimized SQL Server stored procedures and complex queries, improving report generation and system performance.
- Ensured compliance with banking security standards, including authentication, authorization, and secure data handling.
- Actively participated in Agile ceremonies, code reviews, production issue resolution, and root-cause analysis.

Stridemex (OPC)

Full Stack Engineer | Feb 2024 - Oct 2024

- Developed and maintained server-side APIs, database procedures, and Angular integrations for enterprise applications.
- Delivered the L&T Dart System using Angular and .NET within strict timelines, meeting all client requirements.
- Designed and tested 40+ REST APIs, reducing integration defects and improving delivery speed.
- Enhanced workflows in the HDFC banking application, improving usability and operational efficiency.
- Built a PDF scheduler service to split documents based on agreement numbers, increasing productivity by 30%.
- Optimized APIs and UI components for the DMS internal application, improving system stability and user experience.

Enhanced Software Solutions

Software Engineer | Dec 2022 - Jan 2024

- Developed multiple ERP system modules using Angular, improving functionality and user experience.
- Created model classes and backend logic to support ERP workflows and data processing.
- Designed and optimized SQL Server stored procedures for customer portal applications.
- Built an employee onboarding module using HTML and CSS, improving onboarding efficiency by 20%.
- Worked on OutSystems backend development, including encrypted key generation for secure data handling.
- Collaborated with cross-functional teams, contributing to improved delivery timelines.

Projects

Margin Call System | ICICI Bank

Technologies: C#, ASP.NET Web Forms, SQL Server, Scheduler Services

- Developed a Margin Call system for financial risk monitoring and collateral management.
- Built backend services using C#, ASP.NET, and SQL Server to calculate margin exposure and trigger alerts.
- Designed optimized stored procedures to process large volumes of financial data.
- Implemented scheduler services for automated calculations and notifications.
- Worked closely with business analysts and QA teams to ensure accuracy and compliance.

Statement of Accounts | ICICI Bank

Technologies: C#, ASP.NET Web Forms, SQL Server, Scheduler Services

- Developed backend logic to generate date-wise, account-wise, and transaction-wise statements.
- Optimized SQL queries to handle high-volume transaction data.
- Implemented PDF and Excel statement generation with data validation.
- Resolved performance bottlenecks and production issues.

L&T Dart System | L&T Finance

Technologies: C#, ASP.NET Web API, Angular 14, SQL Server, Scheduler Services

- Developed the application from scratch, including APIs, database design, and UI.
- Implemented mail notification services and advanced document search functionality.
- Redesigned the system UI and developed multiple business reports.
- Delivered the project on time with high client satisfaction.

Social Distancing Alert System (Covid Shield)

Technologies: C++, Arduino IDE

- Developed a project aimed at maintaining social distancing in crowded areas such as offline ticket booking locations.
- Utilized an Arduino UNO microcontroller and ultrasonic sensors to measure object distances, ensuring accurate readings for social distancing enforcement.
- Achieved desired results by positioning a flat surface in front of the sensor for effective distance measurement.

Education

Master of Computer Application (MCA) – Pursuing

Mumbai University (IDOL) | 2023–2025

Bachelor of Science in Information Technology – CGPA: 8.9

KLE Society's Science & Commerce College | 2018–2021

Achievements & Certifications

- HackerRank SQL (Basic) Certificate — Issued: Jan 2025 — [\[LINK\]](#)
- HackerRank SQL (Intermediate) Certificate — Issued: Feb 2025 — [\[LINK\]](#)
- Participated in the inter-collegiate Avishkar Research Convention, showcasing innovative projects. [\[LINK\]](#)
- Participant – IoT Project Exhibition (Saket College) [\[LINK\]](#)

Hobbies / Interest

- Boxing (District & State Level Player)
- Chess and Cricket
- Trekking and Nature Exploration

Languages

- **English** - Professional Proficiency
- **Hindi** - Native Proficiency
- **Marathi** - Working Proficiency
